

# MAROFLINE HIGH-DENSITY DRAINAGE BOARDS

## DESCRIPTION

MAROFLINE High-Density Drainage Boards are a protective layer produced from high-density polyethylene (HDPE), resistant to plant roots and decay, and that separates the curtain wall from soil by protecting it from water and moisture.

## SHELF LIFE AND STORAGE

- It is stored upright, and in the open air when necessary.

## FIELDS OF USAGE

- It is recommended for usage to maintain the water and heat insulation applied in the curtain insulation of buildings.

## PRODUCT CODE

## ADVANTAGES

- Protects the waterproofing from damages that may occur while filling the soil.
- The air trapped within bubbles allows the curtain wall to breathe.
- Provides equal distribution of the pressure by the soil load.
- Distributes the load that may occur at one point.

- 150/400 GR (2\*20 or 2\*30 / 1 roll - 40 m<sup>2</sup> or 60 m<sup>2</sup>)
- 200/500 GR (2\*20 or 2\*25 / 1 roll - 40 m<sup>2</sup> or 50 m<sup>2</sup>)
- 250/600 GR (2\*20 / 1 roll - 40 m<sup>2</sup>)
- 300/700 GR (2\*20 / 1 roll - 40 m<sup>2</sup>)
